

The same lab tests at a fraction of the cost!

Hospitals in southwest Ohio can charge hundreds of dollars for routine blood tests. But as a Providence patient, you can have the same tests done for far less by the Providence Medical Laboratory.

Why you should be concerned

- Your health insurance may cover only part of your lab test costs.
- Higher co-insurance and deductibles mean that a significant portion of the cost of lab tests could come out of your pocket.

The highest standard of quality

Providence Medical Laboratory is managed by the physicians of Providence Medical Group, and is certified by both CLIA and COLA, the most respected accreditation organizations in the field.

You'll enjoy greater convenience too—tests can be done in your family doctor's office, instead of a hospital or specialist facility.

| Test Type | Hospital Average* | Providence Medical Laboratory |
|-------------------------------|--------------------------|--------------------------------------|
| Comprehensive Metabolic Panel | \$ 275.00 | \$ 20.00 |
| Lipid Panel | \$ 246.00 | \$ 24.00 |
| CBC with Differential | \$ 119.00 | \$ 14.00 |
| TSH | \$ 191.00 | \$ 50.00 |
| Glucose | \$ 76.00 | \$ 7.00 |
| Hemoglobin A1C | \$ 201.00 | \$ 18.00 |
| Prothrombin Time | \$ 91.00 | \$ 7.00 |

*Based on costs at seven regional hospitals; December, 2016.
