

Revealing your heart's health

Out-of-reach for your out-of-pocket?

Vital heart health tests for a fraction of the cost.

In most cases, insurance only covers a portion of the cost of cardiovascular testing. And the amount area hospitals make you pay out-of-pocket can be significant.

But as a Providence patient, you can have the very same tests performed at PMG Vascular Imaging for far less. Here's how costs compare for common cardiovascular tests:

Test	Hospital*	PMG Vascular Imaging**
Echocardiogram	\$ 3,650.00	\$ 390.00
Carotid Ultrasound	\$ 1,812.00	\$ 325.00
Peripheral Arterial Scan	\$ 2,841.00	\$ 400.00

*Based on quoted costs at a major area hospital networks. Does not include extra costs incurred for interpretation of test results.

**Includes interpretation of test results.

You'll find similar savings on abdominal aorta, venous duplex and thyroid scans.

Ask your Providence provider about affordable heart health testing!
